EXORBITANT SUPPRESSION

There is every indication that the authorities are now welding their unbounded censorious power in an egregiously offensive manner. On the record of the press in this land, perhaps no there period of the same length can show more shaming examples of unprincipled suppression than can be pointed out in the past few weeks. Cases of suppressing vernacular papers of any nationalistic tendency have been numerous... too numerous for each case to receive a proper amount of comment here. We all well understand in what sensitive situation Japan is now, but it can not fully excuse for the overstepping actions of the authorities as regards censorship. They have gone too far beyond the boundary of propriety. Not only what may be called the Korean press is tottering under the heavy chastisement of suppression, but also the freedom of speech has been trampled under the same ruthless feet. Any meeting intended to criticize Governmental measures is virtually gagged. Now that small trum of freedom already restricted almost to nil has at last been wrested away from us!

The other day a mass meeting was planned by some Koreans organized for the purpose to raise a voice against the unscrupulous way in which the Government have dealt with the press, only to prove abortive under the police ban. Perfectly ignorant of the prohibition, large crowds began to gather round the meeting place. It took some dozen mounted policemen and several scores of unmounted and un-uniformed ones to disperse the gathering or, to be more strict, to warn off the eager would-be audience before they actually gathered. What most stirs at once our mirth and indignation is their dramatic arresting of the committee members who were found at the meeting place, despite of their protest that they were there to tell the crowds of the police ban. The mere fact that they were there, where, by the police decree, (it should be understood) no living soul was to be seen that night, was thought sufficient to justify their arrest, whether their object was to carry on the reverse. It is simply preposterous even in this humbled and crushed country. This incident alone can furnish a most prominent page in the history of oppression.
